

# Adam Pugh | Frontend Developer

Email: [adampugh@zoho.com](mailto:adampugh@zoho.com)

## RELEVANT EXPERIENCE

### Frontend Developer

Freelance | Contract | Mar 22 - Present

React - TypeScript - Storybook - SASS - Next.js - Contentful - Git

- Acted as lead frontend developer on two large projects building websites for Premier League clubs Brentford and Southampton, utilising React, TypeScript and Contentful.
- Collaborated with key stakeholders and UX designers to achieve pixel-perfect designs, and supported junior developers with complex issues and code reviews on an Asia-Pacific project for Augusta, built in Next.js and GraphQL.
- Sole front-end resource across ongoing client retainers, including PSG and Team GB, handling daily bug fixes across varied tech stacks alongside daily cross-team meetings.
- Part of a team that won the Best Business serving Football award at the Sports Business Awards 2022

### Frontend Developer

Uniprio | Remote, UK | Apr 19 - Dec 21

React - JavaScript - jQuery - SASS - Qubit - A/B Testing

- Worked with clients' in-house tech teams and designers to implement features for global e-commerce brands including Louis Vuitton, Estée Lauder and Emirates. Converted mockups into pixel-perfect A/B tests to create effective improvements to conversion rates using React, HTML/SASS and JavaScript (ES6).
- Worked across multidisciplinary agile teams assisting with code reviews and process improvements.
- Created VSCode extensions in TypeScript for faster development within the team.

### Frontend Developer

Aflete | London, UK | Jun 18 - Jan 19

React - Redux - JavaScript - Gatsby - GraphQL - Draft.js

- Converted designs and mockups into high quality responsive sites using HTML, SASS and React.
- Solely responsible for developing a hybrid front end web application for a private members area. Utilising React and Gatsby.js with GraphQL for fetching data and dynamically building pages.
- Built rich front end projects using React, Redux and SASS including a website builder with Draft.js and Amazon S3.
- Maintained existing codebase built in React and Redux fixing bugs and implementing new features and optimisations.
